The Projects are Class 3 Solar Facilities, each with a maximum name plate capacity of 10 MW (AC), and will utilize solar photovoltaic technology to generate electricity. Electricity generated by solar PV panels will be converted from direct current to alternating current by inverters, and subsequently stepped-up via pad-mounted transformers, prior to being connected to the existing local distribution line.
Newboro 1 Solar Farm: OPA reference number is FIT-FGJ9196. The REA number is 0325-98FHZK.
Newboro 4 Solar Farm: OPA reference number is FIT-FNQQKBW. The REA number is 8926-94VKR7

Project Changes
For the **Newboro 1 Solar Farm**, SunE Ray GP Corp., requires an amendment in order to take into consideration a change in the inverter model. Though, no changes to the locations of any noise-generating equipment are proposed. A revised Noise Assessment Report has been prepared which demonstrates that the sound power levels remain compliant with the Ontario Ministry of the Environment and Climate Change (MOECC) regulated limit of 40 dBA.

For the **Newboro 4 Solar Farm**, SunE Newboro 4 GP Corp., requires an amendment in order to take into consideration two changes, firstly a change in the internal alignment of the access roads and solar panel arrangement. No change to the Project footprint will occur as a result of this change. Secondly, a change in the inverter model. A revised Noise Assessment Report has been prepared which demonstrates that the sound power levels remain compliant with the MOECC regulated limit of 40 dBA.
